

Impact

A Measure of success...

Ultimately we measure impact through the success of our aims. Students will:

- ✿ After completing the Overlay journey, have achieved individually outstanding end points, with reduced anxiety and key life skills across different curricular areas.
- ✿ Be better equipped for their next destination while being able to use a more 'functional level of communication' across different contexts and settings.
- ✿ Have an individual tool box of communication that enables choice, expression, emotional development, personal awareness and a greater level of understanding around right and wrong.
- ✿ Have gained greater ability to regulate their emotions, think more independently and solve problems with reduced reliance on others.
- ✿ Be able to transition onto their next chapter in life, having had extensive opportunities for building resilience, tolerance, becoming more accepting of differences and achieving greater harmony.
- ✿ On their journey through school, will have experienced what it feels like to thrive, gaining confidence, self-awareness, pride and contentment whilst encountering success.
- ✿ Be more effective at interacting positively with others, being kind, safe and friendly.
- ✿ Leave more able to manage unexpected change and make transitions both small and large with less support.
- ✿ Following the gradual development of life skills and vocational experience, be ready to engage in work based activities, centred around interests and strengths, giving joint attention with more willingness to function as part of a team.
- ✿ Have gained a deeper understanding of skills and knowledge related to relevant subject disciplines, with improved generalisation and diminishing levels of support.
- ✿ Leave whilst accessing a more inclusive and productive life, positively contributing to society, making meaningful contributions with their local community with a love for learning and achievement.
